

"SC" Rate
School/Church Service
Effective November 1, 2014
234, 730

Availability

This rate is available for all three-phase and general power uses of public schools and churches, with a metered peak demand no greater than 1000 KW during any two consecutive billing cycles, or any three billing cycles during the past 12 months.

Character of Service

The type of service rendered under this rate schedule shall be alternating current, sixty (60) Hertz, three-phase at a voltage agreed upon by Heartland REMC.

Rate -- Monthly

Facilities Charge:	\$ 90.00 per month
Demand Charge:	\$ 9.25 per KW
Energy Charge:	\$.06100 per KWH
Contract Add-On	If Applicable

Minimum Monthly Charge

- The minimum monthly charge shall be the Facility Charge.

Determination of Billing Demand

The billing demand shall be the maximum average kilowatt load recorded during any period of fifteen (15) consecutive minutes during the month for which the bill is rendered, as recorded by the REMC's maximum load meter. As provided below, an adjustment for Power Factor shall be applied.

Power Factor

The member agrees to maintain unity Power Factor. Heartland REMC reserves the right to measure Power Factor at any point. Should such measurements indicate the Power Factor at peak demand during a billing period is less than 90%, the recorded maximum billing demand shall be adjusted by multiplying the metered demand (kW) by 90% and dividing by the Power Factor percentage recorded.

Conditions of Service

- The member may be required to enter into a written agreement stating the character of load, minimum contract period, minimum monthly charge, and any other charges.
- An associated residence usage may be included on this meter, or it can be separately metered and billed under a Residential rate.
- This rate is available for schools and churches as defined by Heartland REMC personnel.
- Heartland REMC will furnish and maintain at its expense, one transformer and service drop from its existing primary line. Primary line extensions required to serve the meter point are subject to existing line extension policies.
 - When the member requests a primary or secondary line extension beyond the meter point, such poles, wires and other electrical equipment shall be installed and maintained at the member's expense.
- Should the electrical energy furnished under this rate schedule be metered on the primary side of the service transformer(s), Heartland REMC shall deduct 1½% of the total energy revenue for that billing month.
- This rate is applicable to the "Delivered" energy that flows from the grid to the member equipment. When a renewable energy generation resource is interconnected to the Heartland REMC electric system, this rate shall not apply to the "Received" energy that flows back onto the grid. Assuming that an interconnection agreement is in place, "Received" energy shall be paid at "Avoided Cost" which will be adjusted from time to time.
- This rate requires continuous service. Where the electrical load is not deemed "primarily seasonal" by Heartland REMC, and the account is disconnected for less than 12 months, all minimum monthly charges avoided during the disconnected period, plus a re-connect trip charge, shall be paid prior to re-establishing the account in the same name or that of another family member.

Wholesale Power Cost Adjustment

The above rates are subject to purchased power cost tracking adjustments as charged to Heartland REMC by its power supplier.
